Technology for a New Age

ASAHI SEISAKUSHO
<http://www.theglassplant.com>

Progress is constantly being made in this modern age, with daily research and development in a variety of fields such as medicine, biotechnology, and fine chemicals. Glass is an indispensable material for this research and development.

Glass is transparent and resistant to acid. These properties are applied in a wide range of uses, and support science and technology today.

In addition, highly pure quartz glass, absent of iron and other impurities, maximizes the capacity of production lines in the field of information and communications technology.

ASAHI SEISAKUSHO INC. :

leading manufacturer of borosilicate glass in Japan

ASAHI SEISAKUSHO Co. LTD.:

sales and marketing of glass equipment and other

ASAHI SEMICON:

manufacturer of quartz

KYUSHU Quartz:

manufacturer of quartz, joint venture with Toshiba Ceramics

ASAHI Techno Research:

pollution control

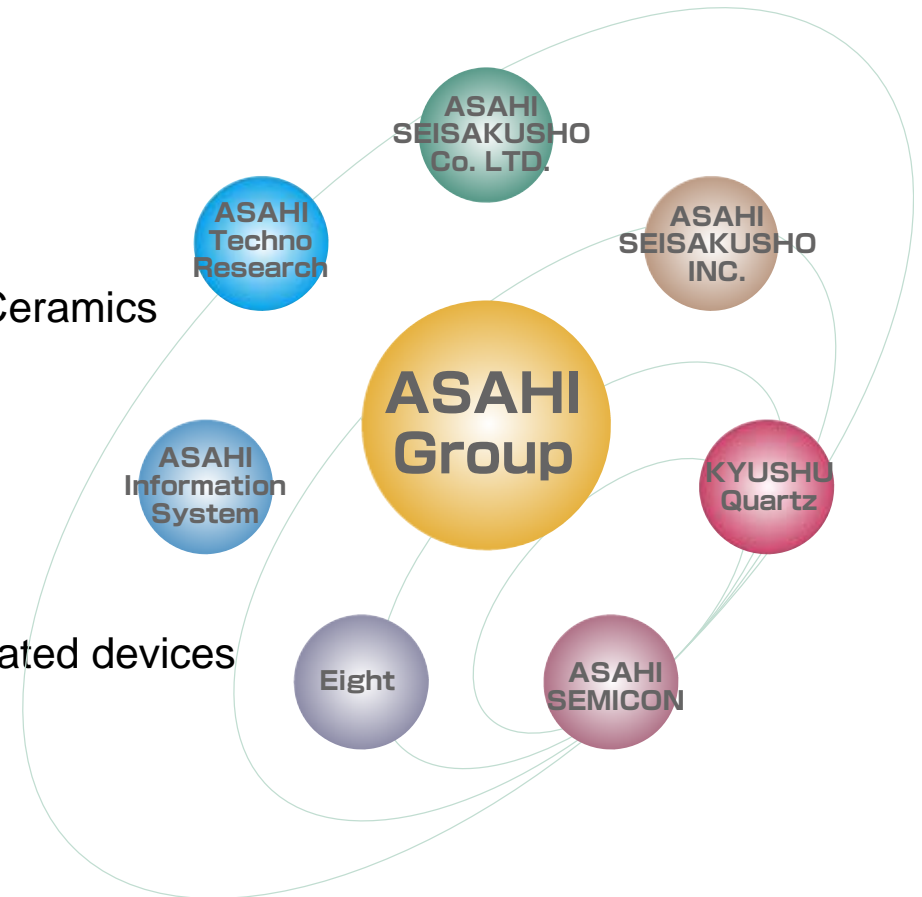

ASAHI Information System:

development of software

Eight:

maintenance and after service of semiconductor related devices

Few other companies

Company Profile

ASAHI SEISAKUSHO

- **ASAHI Seisakusho Inc. was founded in 1950.**
- **Total Number of Employees: approx. 500 (ASAHI Group)**

Technology for a New Age

ASAHI SEISAKUSHO
<http://www.theglassplant.com>

With over 50 years experience in the production of specialized glassware and processing equipment, Asahi Seisakusho takes pride in understanding the needs and concerns of the chemical processing professionals and researchers who rely on its products.

Asahi's products form the backbone of the chemical processing industry, but they are far from standard: even the most familiar-looking system has been optimized to achieve the highest possible levels of performance, safety, ease of use and maintenance.

This is an innovation born from the wish lists of users, made possible by the expertise of master craftsmen.

ASAHI Triple Wall Vessel 50L

Product Line

ASAHI SEISAKUSHO
<http://www.theglassplant.com>

Reaction Unit
(5L, 10L)

Rotary Evaporator
(50, 100 and 200L)

Molecular Distillation System
(0.045m², 0.33m²)

Ultra-Low Temperature
Reaction Unit (20L ~ 60L)

Shell and Tube Heat Exchanger
(0.3m² ~ 100m²)

Reaction Vessel
(300cc ~ 6L)

Pressure Reactor
(500cc, 1L, 2L)

Coil Type Heat Exchanger
(0.2m² ~ 12.0m²)

Quartz Heater & Burner
(Patented)

Thin Film Evaporator
(0.05m² ~ 1.2m²)

Location of Asahi Group
